ANGUS CHEMICAL COMPANY encourages and expects you to read and understand the entire (M)SDS, as there is important information throughout the document. We expect you to follow the precautions identified in this document unless your use conditions would necessitate other appropriate methods or actions.

### 1. PRODUCT AND COMPANY IDENTIFICATION

**Product name**
AB™-95 dl-2-Amino-1-butanol

**Manufacturer or supplier's details**

**Company name of supplier**
ANGUS CHEMICAL COMPANY

**Address**
1500 E. LAKE COOK ROAD
Buffalo Grove IL 60089-6553

**Customer Information Number**
+1-847-808-3711

**E-mail address**
NAR_CC@ANGUS.COM

**Emergency telephone number**
800-424-9300

**Recommended use of the chemical and restrictions on use**

**Recommended use**
Chemical intermediate.
Neutralizing agent.
For industrial use.

The ANGUS Chemical Company recommends that you use this product in a manner consistent with the listed use. If your intended use is not consistent with the stated use, please contact the Customer Information Group (see Section 1 of this data sheet).

### 2. HAZARDS IDENTIFICATION

**GHS Classification**

**Flammable liquids**
Category 4

**Acute toxicity (Oral)**
Category 4
Product name: AB™-95 dl-2-Amino-1-butanol

Skin corrosion Category 1A
Serious eye damage Category 1

GHS Label elements, including precautionary statements

Hazard pictograms

- [Hazard pictogram]
- [Signal word]

Signal word Danger

Hazard statements
Combustible liquid.
Harmful if swallowed.
Causes severe skin burns and eye damage.

Precautionary statements

Prevention:
Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
Wash skin thoroughly after handling.
Do not eat, drink or smoke when using this product.
Wear protective gloves/ protective clothing/ eye protection/ face protection.

Response:
IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. Rinse mouth.
IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.
Wash contaminated clothing before reuse.
In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish.

Storage:
Store in a well-ventilated place. Keep cool.
Store locked up.

Disposal:
Dispose of contents/container to an approved waste disposal plant.

Other hazards
None known.
3. COMPOSITION/INFORMATION ON INGREDIENTS

This product is a mixture.

**Components**

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>CAS-No.</th>
<th>Concentration (% w/w)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2-Amino-1-butanol</td>
<td>96-20-8</td>
<td>&gt;= 95.0 - &lt;= 100.0 %</td>
</tr>
<tr>
<td>2-(Methylamino)-1-butanol</td>
<td>27646-79-3</td>
<td>&lt;= 5.0 %</td>
</tr>
<tr>
<td>Water</td>
<td>7732-18-5</td>
<td>&lt;= 5.0 %</td>
</tr>
</tbody>
</table>

Component CAS# 96-20-8 may also be described by CAS# 13054-87-0 for regulatory purposes.

4. FIRST AID MEASURES

**If inhaled**

Move person to fresh air; if effects occur, consult a physician.

**In case of skin contact**

Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing. Seek medical attention if symptoms occur or irritation persists. Wash clothing before reuse. Suitable emergency safety shower facility should be immediately available.

**In case of eye contact**

Wash immediately and continuously with flowing water for at least 30 minutes. Remove contact lenses after the first 5 minutes and continue washing. Obtain prompt medical consultation, preferably from an ophthalmologist. Suitable emergency eye wash facility should be immediately available.

**If swallowed**

Seek medical attention immediately. Do not induce vomiting. Give one cup (8 ounces or 240 ml) of water or milk if available and transport to a medical facility. Do not give anything by mouth unless the person is fully conscious.

**Most important symptoms and effects, both acute and delayed**

Aside from the information found under Description of first aid measures (above) and Indication of immediate medical attention and special treatment needed (below), any additional important symptoms and effects are described in Section 11: Toxicology Information.

**Protection of first-aiders**

First Aid responders should pay attention to self-protection and use the recommended protective clothing (chemical resistant gloves, splash protection). If potential for exposure exists refer to Section 8 for specific personal protective equipment.

**Notes to physician**

If burn is present, treat as any thermal burn, after decontamination. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. No specific antidote. Due to irritant properties, swallowing may result in burns/ulceration of mouth, stomach and lower gastrointestinal tract with subsequent stricture. Aspiration of vomitus may cause lung injury. Suggest endotracheal/esophageal control if...
lavage is done.
Chemical eye burns may require extended irrigation. Obtain
prompt consultation, preferably from an ophthalmologist.

5. FIREFIGHTING MEASURES

<table>
<thead>
<tr>
<th>Suitable extinguishing media</th>
<th>Water fog or fine spray. Carbon dioxide fire extinguishers. Dry chemical fire extinguishers. Foam. Alcohol resistant foams (ATC type) are preferred. General purpose synthetic foams (including AFFF) or protein foams may function, but will be less effective.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specific hazards during firefighting</td>
<td>Violent steam generation or eruption may occur upon application of direct water stream to hot liquids.</td>
</tr>
<tr>
<td>Hazardous combustion products</td>
<td>During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and/or irritating. Combustion products may include and are not limited to: Carbon dioxide. Carbon monoxide. Nitrogen oxides.</td>
</tr>
<tr>
<td>Further information</td>
<td>Keep people away. Isolate fire and deny unnecessary entry. Do not use direct water stream. May spread fire. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage. Burning liquids may be extinguished by dilution with water.</td>
</tr>
<tr>
<td>Special protective equipment for firefighters</td>
<td>Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots, and gloves). Avoid contact with this material during fire fighting operations. If contact is likely, change to full chemical resistant fire fighting clothing with self-contained breathing apparatus. If this is not available, wear full chemical resistant clothing with self-contained breathing apparatus and fight fire from a remote location. For protective equipment in post-fire or non-fire clean-up situations, refer to the relevant sections.</td>
</tr>
</tbody>
</table>

6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protective equipment and emergency procedures | Keep upwind of spill. Ventilate area of leak or spill. No smoking in area. Only trained and properly protected personnel must be involved in clean-up operations. Evacuate area. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection. Refer to section 7, Handling, for additional precautionary |
Environmental precautions
Spills or discharge to natural waterways is likely to kill aquatic organisms.
Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.

Methods and materials for containment and cleaning up
Contain spilled material if possible.
Collect in suitable and properly labeled containers.
See Section 13, Disposal Considerations, for additional information.

7. HANDLING AND STORAGE

Advice on safe handling
Keep away from heat, sparks and flame.
Spills of these organic materials on hot fibrous insulations may lead to lowering of the autoignition temperatures possibly resulting in spontaneous combustion.
Containers, even those that have been emptied, can contain vapors. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers.
Do not swallow.
Wash thoroughly after handling.
Avoid breathing vapor or mist.
Use with adequate ventilation.
Do not get in eyes, on skin, on clothing.
Keep container closed.
See Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION.

Conditions for safe storage
Store in original unopened container.
Store in a dry place.
Do not store in:
Zinc.
Galvanized containers.
Aluminum.
Copper.
Copper alloys.
Brass.

8. EXPOSURE CONTROLS/PERSOAL PROTECTION

Components with workplace control parameters
Contains no substances with occupational exposure limit values.

Engineering measures
Local exhaust ventilation may be necessary for some operations.
Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations.
Personal protective equipment

Respiratory protection
Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, wear respiratory protection when adverse effects, such as respiratory irritation or discomfort have been experienced, or where indicated by your risk assessment process.
For most conditions, no respiratory protection should be needed; however, if material is heated or sprayed, use an approved air-purifying respirator.
The following should be effective types of air-purifying respirators:
Organic vapor cartridge with a particulate pre-filter, type AP2.

Hand protection

Eye protection
Use chemical goggles.

Skin and body protection
Use protective clothing chemically resistant to this material. Selection of specific items such as face shield, boots, apron, or full body suit will depend on the task.

**NOTE:** The physical data presented above are typical values and should not be construed as a specification.
10. STABILITY AND REACTIVITY

Reactivity
No data available.

Chemical stability
Stable under recommended storage conditions. See Storage, Section 7.

Possibility of hazardous reactions
Polymerization will not occur.

Conditions to avoid
Exposure to elevated temperatures can cause product to decompose.
Product absorbs carbon dioxide from the air.
Reaction with carbon dioxide may form carbonate salts.

Incompatible materials
Avoid contact with:
Strong acids.
Strong oxidizers.
Avoid contact with metals such as:
Zinc.
Galvanized metals.
Aluminum.
Copper.
Copper alloys.
Brass.
Avoid unintended contact with:
Halogenated hydrocarbons.

Hazardous decomposition products
Decomposition products depend upon temperature, air supply and the presence of other materials.

11. TOXICOLOGICAL INFORMATION

Toxicological information on this product or its components appear in this section when such data is available.

Acute toxicity

Product:

Acute oral toxicity
Remarks: Low toxicity if swallowed.
Small amounts swallowed incidentally as a result of normal handling operations are not likely to cause injury; however, swallowing larger amounts may cause injury.
Swallowing may result in irritation or burns of the mouth, throat, and gastrointestinal tract.

LD50 (Rat, male and female): 1,800 mg/kg

Acute inhalation toxicity
Remarks: At room temperature, exposure to vapor is minimal due to low volatility.
Vapor from heated material or mist may cause respiratory irritation.
Remarks: The LC50 has not been determined.
Acute dermal toxicity
Remarks: Absorption has not been determined due to corrosivity.
Remarks: The dermal LD50 has not been determined.

Components:
2-Amino-1-butanol

Acute oral toxicity
LD50 (Rat, male and female): 1,800 mg/kg
Method: OECD 401 or equivalent

Acute inhalation toxicity
Remarks: At room temperature, exposure to vapor is minimal due to low volatility.
Vapor from heated material or mist may cause respiratory irritation.
Remarks: The LC50 has not been determined.

Acute dermal toxicity
Remarks: The dermal LD50 has not been determined.

Skin corrosion/irritation

Product:
Result: Corrosive
Remarks: Brief contact may cause skin burns. Symptoms may include pain, severe local redness and tissue damage.

Components:
2-Amino-1-butanol

Result: Corrosive
Remarks: Brief contact may cause skin burns. Symptoms may include pain, severe local redness and tissue damage.

Serious eye damage/eye irritation

Product:
Result: Corrosive
Remarks: May cause severe irritation with corneal injury which may result in permanent impairment of vision, even blindness. Chemical burns may occur.
Mist may cause eye irritation.

Components:
2-Amino-1-butanol

Result: Corrosive
Remarks: May cause severe irritation with corneal injury which may result in permanent impairment of vision, even blindness. Chemical burns may occur.
Mist may cause eye irritation.

Respiratory or skin sensitization

Product:
Remarks: For similar material(s):
Did not cause allergic skin reactions when tested in guinea pigs.

Remarks: For respiratory sensitization:
No relevant data found.

**Components:**

**2-Amino-1-butanol**

Remarks: For similar material(s):
Did not cause allergic skin reactions when tested in guinea pigs.

Remarks: For respiratory sensitization:
No relevant data found.

**Carcinogenicity**

**Product:**
No relevant data found.

**Components:**

**2-Amino-1-butanol**
No relevant data found.

**IARC**
No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

**OSHA**
No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.

**NTP**
No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

**Teratogenicity**

**Product**
2-Aminobutanol hydrochloride salt caused maternal toxicity leading to death of embryos when administered orally to pregnant rats in a reproductive screening study. No developmental effects were observed in this study.

**Components:**

**2-Amino-1-butanol**
2-Aminobutanol hydrochloride salt caused maternal toxicity leading to death of embryos when administered orally to pregnant rats in a reproductive screening study. No developmental effects were observed in this study.
Mutagenicity

**Product**
In vitro genetic toxicity studies were negative.

**Components:**
2-Amino-1-butanol
In vitro genetic toxicity studies were negative.

Reproductive toxicity

**Product:**
In animal studies, did not interfere with reproduction.

**Components:**
2-Amino-1-butanol
In animal studies, did not interfere with reproduction.

STOT - single exposure

**Product:**
Assessment: Material is corrosive. Material is not classified as a respiratory irritant; however, upper respiratory tract irritation or corrosivity may be expected.

**Components:**
2-Amino-1-butanol
Assessment: Material is corrosive. Material is not classified as a respiratory irritant; however, upper respiratory tract irritation or corrosivity may be expected.

Repeated dose toxicity

**Product:**
Remarks: In animals, effects have been reported on the following organs: Liver.

**Components:**
2-Amino-1-butanol
Remarks: In animals, effects have been reported on the following organs: Liver.

Aspiration toxicity

**Product:**
Aspiration Hazard Based on physical properties, not likely to be an aspiration hazard.

**Components:**
2-Amino-1-butanol
Based on physical properties, not likely to be an aspiration hazard.
12. ECOLOGICAL INFORMATION

 Ecotoxicity

**Product**: AB™-95 dl-2-Amino-1-butanol

**Remarks**: Material is highly toxic to aquatic organisms on an acute basis (LC50/EC50 between 0.1 and 1 mg/L in the most sensitive species tested).

- **LC50** (Leuciscus idus (Golden orfe)): 270 mg/l
  - Exposure time: 96.0 h
  - Test Type: static test
  - Method: OECD Test Guideline 203 or Equivalent

- **LC50** (Oncorhynchus mykiss (rainbow trout)): > 952 mg/l
  - Exposure time: 96.0 h
  - Test Type: static test
  - Method: OECD Test Guideline 203 or Equivalent

**EC50** (Daphnia magna (Water flea)): 115.00 mg/l
- Exposure time: 48.0 h
- Test Type: static test
- Method: OECD Test Guideline 202 or Equivalent

**ErC50** (Pseudokirchneriella subcapitata (green algae)): > 0.94 mg/l
- End point: Growth rate inhibition
- Exposure time: 96 h
- Test Type: static test
- Method: OECD Test Guideline 201 or Equivalent

**M-Factor (Acute aquatic toxicity)**: 1

**Toxicity to bacteria**
- **EC50** (activated sludge): 329.2 mg/l
  - End point: Respiration rates.
  - Exposure time: 3 h
  - Test Type: static test
  - Method: OECD 209 Test

**Components**: 2-Amino-1-butanol

**Remarks**: Material is very toxic to aquatic organisms (LC50/EC50/IC50 below 1 mg/L in the most sensitive species).

- **LC50** (Leuciscus idus (Golden orfe)): 270 mg/l
  - Exposure time: 96.0 h
  - Test Type: static test
  - Method: OECD Test Guideline 203 or Equivalent

- **LC50** (Oncorhynchus mykiss (rainbow trout)): > 952 mg/l
Exposure time: 96.0 h
Test Type: static test
Method: OECD Test Guideline 203 or Equivalent

Toxicity to daphnia and other aquatic invertebrates
EC50 (Daphnia magna (Water flea)): 115.00 mg/l
Exposure time: 48.0 h
Test Type: static test
Method: OECD Test Guideline 202 or Equivalent

Toxicity to algae
ErC50 (Pseudokirchneriella subcapitata (green algae)): > 0.94 mg/l
End point: Growth rate inhibition
Exposure time: 96 h
Test Type: static test
Method: OECD Test Guideline 201 or Equivalent

EyC50 (Pseudokirchneriella subcapitata (green algae)): 0.62 mg/l
End point: Cell yield inhibition
Exposure time: 96 h
Test Type: static test
Method: OECD Test Guideline 201 or Equivalent

M-Factor (Acute aquatic toxicity)
1

Toxicity to bacteria
EC50 (activated sludge): 329.2 mg/l
End point: Respiration rates.
Exposure time: 3 h
Test Type: static test.
Method: OECD 209 Test

Persistence and degradability

Product:
Biodegradability
Test Type: aerobic
Inoculum: Sewage, domestic, non-adapted
Concentration: 11 mg/l
Biodegradation: 93 %
Exposure time: 28 d
Method: OECD Test Guideline 301F or Equivalent
Remarks: 10-day Window: Pass

ThOD
2.690 mg/mg
Method: Calculated.

Photodegradation
Sensitiser: OH radicals
Rate constant: Degradation half life: 0.2 d
Method: Estimated.

Components:
2-Amino-1-butanol
Biodegradability
Result: Readily biodegradable
Remarks: Material is readily biodegradable. Passes OECD test(s) for ready biodegradability.

Biodegradation: 93 %
Exposure time: 28 d
Method: OECD Test Guideline 301F or Equivalent
Remarks: 10-day Window: Pass

ThOD
2.690 mg/mg
Method: Calculated.

Photodegradation
Sensitiser: OH radicals
Rate constant: Degradation half life: 0.2 d
Method: Estimated.

Bioaccumulative potential

Product:
Partition coefficient: n-octanol/water
log Pow: -0.45
Method: Measured
Remarks: Bioconcentration potential is low (BCF < 100 or Log Pow < 3).

Components:
2-Amino-1-butanol
Partition coefficient: n-octanol/water
log Pow: -0.45
Method: Measured
Remarks: Bioconcentration potential is low (BCF < 100 or Log Pow < 3).

Mobility in soil

Product:
Distribution among environmental compartments
Koc: < 1
Method: Estimated.
Remarks: Potential for mobility in soil is very high (Koc between 0 and 50).
Given its very low Henry's constant, volatilization from natural bodies of water or moist soil is not expected to be an important fate process.

Components:
2-Amino-1-butanol
Distribution among environmental compartments
Koc: < 1
Method: Estimated.
Remarks: Potential for mobility in soil is very high (Koc between 0 and 50).
Given its very low Henry's constant, volatilization from natural bodies of water or moist soil is not expected to be an important fate process.
Other adverse effects

Product:

Ozone-Depletion Potential Regulation: 40 CFR Protection of Environment; Part 82 Protection of Stratospheric Ozone - CAA Section 602 Class I Substances Remarks: This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).

Components:

2-Amino-1-butanol

Results of PBT and vPvB assessment Non-classified vPvB substance Non-classified PBT substance

Ozone-Depletion Potential Remarks: This substance is not in Annex I of Regulation (EC) No 1005/2009 on substances that deplete the ozone layer.

13. DISPOSAL CONSIDERATIONS

Disposal methods

Waste from residues DO NOT DUMP INTO ANY SEwers, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator. THE INFORMATION PRESENTED HERE PERTAINS ONLY TO THE PRODUCT AS SHIPPED IN ITS INTENDED CONDITION AS DESCRIBED IN MSDS SECTION: Composition Information. FOR UNUSED & UNCONTAMINATED PRODUCT, the preferred options include sending to a licensed, permitted: Incinerator or other thermal destruction device. Landfill. ANGUS HAS NO CONTROL OVER THE MANAGEMENT PRACTICES OR MANUFACTURING PROCESSES OF PARTIES HANDLING OR USING THIS MATERIAL.

**15. REGULATORY INFORMATION**
**OSHA Hazards**
This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

**EPCRA - Emergency Planning and Community Right-to-Know Act**

**SARA 304 Extremely Hazardous Substances Reportable Quantity**
This material does not contain any components with a section 304 EHS RQ.

**SARA 311/312 Hazards**
- Fire Hazard
- Acute Health Hazard

**SARA 302**
No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

**SARA 313**
This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

**Clean Air Act**
This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).
This product does not contain any hazardous air pollutants (HAP), as defined by the U.S. Clean Air Act Section 12 (40 CFR 61).
This product does not contain any chemicals listed under the U.S. Clean Air Act Section 112(r) for Accidental Release Prevention (40 CFR 68.130, Subpart F).
This product does not contain any chemicals listed under the U.S. Clean Air Act Section 111 SOCMI Intermediate or Final VOC’s (40 CFR 60.489).

**Clean Water Act**
This product does not contain any toxic pollutants listed under the U.S. Clean Water Act Section 307

**US State Regulations**

**California Prop. 65**
This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.

**The components of this product are reported in the following inventories:**
- United States TSCA Inventory
All components of this product are on the TSCA Inventory or are exempt from TSCA Inventory requirements under 40 CFR 720.30

Remarks:
2-(Methylamino)-1-butanol is considered an impurity in this product and is therefore not required to be specifically listed on certain chemical control inventories such as TSCA.
