ANGUS CHEMICAL COMPANY encourages and expects you to read and understand the entire (M)SDS, as there is important information throughout the document. We expect you to follow the precautions identified in this document unless your use conditions would necessitate other appropriate methods or actions.

1. PRODUCT AND COMPANY IDENTIFICATION

**Product name**

IPHA I-15™, Hydroxylamine

**Manufacturer or supplier's details**

Company name of supplier

ANGUS CHEMICAL COMPANY

**Address**

1500 E. LAKE COOK ROAD
Buffalo Grove IL 60089-6553

**Customer Information Number**

+1-847-808-3711

**E-mail address**

NAR_CC@ANGUS.COM

**Emergency telephone number**

800-424-9300

**Recommended use of the chemical and restrictions on use**

Recommended use

Monomer stabilizer.
Polymerization chainstopper.
Synthesis intermediate.
Photochemical additive.
For industrial use.

The ANGUS Chemical Company recommends that you use this product in a manner consistent with the listed use. If your intended use is not consistent with the stated use, please contact the Customer Information Group (see Section 1 of this data sheet).

2. HAZARDS IDENTIFICATION

**GHS Classification**
Not a hazardous substance or mixture.

**GHS Label elements, including precautionary statements**
This product is not hazardous per the Globally Harmonized System of Classification and Labelling (GHS).

**Other hazards**
None known.

---

3. **COMPOSITION/INFORMATION ON INGREDIENTS**

This product is a mixture.

**Components**

4. **FIRST AID MEASURES**

- **If inhaled**
  Move person to fresh air; if effects occur, consult a physician.

- **In case of skin contact**
  Wash off with plenty of water.

- **In case of eye contact**
  Flush eyes thoroughly with water for several minutes. Remove contact lenses after the initial 1-2 minutes and continue flushing for several additional minutes. If effects occur, consult a physician, preferably an ophthalmologist.

- **If swallowed**
  If swallowed, seek medical attention. Do not induce vomiting unless directed to do so by medical personnel.

- **Most important symptoms and effects, both acute and delayed**
  Aside from the information found under Description of first aid measures (above) and Indication of immediate medical attention and special treatment needed (below), any additional important symptoms and effects are described in Section 11: Toxicology Information.

- **Protection of first-aiders**
  If potential for exposure exists refer to Section 8 for specific personal protective equipment.

- **Notes to physician**
  Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. No specific antidote.

---

5. **FIREFIGHTING MEASURES**

**Suitable extinguishing media**
Water fog or fine spray.
Carbon dioxide fire extinguishers.
Dry chemical fire extinguishers.
Foam.
General purpose synthetic foams (including AFFF type) or protein foams are preferred if available. Alcohol resistant
foams (ATC type) may function.

Specific hazards during firefighting
Product may produce flash fire, but will not continue to burn. If exposed to intense heat, water in the product may evaporate, leaving a residue. Residue can burn.

Hazardous combustion products
Combustion products may include and are not limited to:
- Carbon dioxide.
- Carbon monoxide.
- Nitrogen oxides.
Under fire conditions some components of this product may decompose. The smoke may contain unidentified toxic and/or irritating compounds.

Further information
Keep people away. Isolate fire and deny unnecessary entry. To extinguish combustible residues of this product use water fog, carbon dioxide, dry chemical or foam. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of reignition has passed. Eliminate ignition sources.

Special protective equipment for firefighters
Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures
Isolate area. Keep unnecessary and unprotected personnel from entering the area. No smoking in area. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection. Refer to section 7, Handling, for additional precautionary measures.

Environmental precautions
Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.

Methods and materials for containment and cleaning up
Pump with explosion-proof equipment. If available, use foam to smother or supress. Contain spilled material if possible. Collect in suitable and properly labeled containers. See Section 13, Disposal Considerations, for additional information.

7. HANDLING AND STORAGE

Advice on safe handling
Containers, even those that have been emptied, can contain vapors. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers.
Use of non-sparking or explosion-proof equipment may be necessary, depending upon the type of operation.

No smoking, open flames or sources of ignition in handling and storage area.
Wash thoroughly after handling.
See Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION.

Conditions for safe storage
Minimize sources of ignition, such as static build-up, heat, spark or flame.
Product may become a solid at temperatures below -5°C (23°F)
Store in a cool, dry place.
Storage tanks should be blanketed with nitrogen.
Keep container tightly closed when not in use.
Do not store in: Aluminum.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering measures
Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations.

Personal protective equipment

Respiratory protection
Under intended handling conditions, no respiratory protection should be needed.

Hand protection
Use gloves chemically resistant to this material when prolonged or frequently repeated contact could occur. Examples of preferred glove barrier materials include: Polyethylene. Ethyl vinyl alcohol laminate ("EVAL"). Chlorinated polyethylene. Examples of acceptable glove barrier materials include: Butyl rubber. Nitrile/butadiene
rubber ("nitrile" or "NBR"). Natural rubber ("latex"). Neoprene.
Viton. Polyvinyl chloride ("PVC" or "vinyl"). Avoid gloves
made of: Polyvinyl alcohol ("PVA"). NOTICE: The selection of
a specific glove for a particular application and duration of
use in a workplace should also take into account all relevant
workplace factors such as, but not limited to: Other chemicals
which may be handled, physical requirements (cut/puncture
protection, dexterity, thermal protection), potential body
reactions to glove materials, as well as the
instructions/specifications provided by the glove supplier.

Eye protection Use safety glasses (with side shields).

Skin and body protection Wear clean, body-covering clothing.

**Product name:** IPHA I-15™, Hydroxylamine  
**Issue Date:** 11/02/2017

### Active ingredient

- **Relative Vapor Density (air = 1)**  
  No test data available

- **Relative density**  
  1 (25 °C)  
  Method: Literature

- **Water solubility**  
  Miscible with water

- **Partition coefficient: n-octanol/water**  
  No test data available

- **Auto-ignition temperature**  
  No test data available

- **Decomposition temperature**  
  No test data available

- **Viscosity**  
  - **Viscosity, dynamic**  
    1 mPa.s (20 °C)  
    Method: Literature Approx.

- **Explosive properties**  
  No data available.

- **Oxidizing properties**  
  No data available.

- **Fire Point**  
  >100  
  Does not sustain combustion.  
  Method: ISO 2592

- **Refractive index**  
  1.357  
  Method: ANGUS 1700

- **Molecular weight**  
  75.11 g/mol  
  Method: Literature

**NOTE:** The physical data presented above are typical values and should not be construed as a specification.

### 10. STABILITY AND REACTIVITY

- **Reactivity**  
  No dangerous reaction known under conditions of normal use.

- **Chemical stability**  
  Stable under recommended storage conditions. See Storage, Section 7.  
  Unstable at elevated temperatures.

- **Conditions to avoid**  
  - Avoid temperatures above 40 °C
  - Avoid temperatures below -5 °C
Generation of gas during decomposition can cause pressure in closed systems. Active ingredient decomposes at elevated temperatures. Avoid direct sunlight or ultraviolet sources. Avoid contact with air (oxygen).

**Incompatible materials**

Avoid contact with oxidizing materials. Avoid contact with:
- Air.
- Avoid contact with metals such as:
  - Iron.
- Avoid unintended contact with:
  - Oxygen.
- Free radical sources.
- Avoid contact with absorbent materials such as:
  - Clay-based absorbents.

**Hazardous decomposition products**

Decomposition products depend upon temperature, air supply and the presence of other materials. Decomposition products can include and are not limited to:
- Carbon dioxide.
- Carbon monoxide.
- Nitrogen oxides.

---

**11. TOXICOLOGICAL INFORMATION**

*Toxicological information on this product or its components appear in this section when such data is available.*

**Acute toxicity**

**Product:**

**Acute oral toxicity**

Remarks: Small amounts swallowed incidentally as a result of normal handling operations are not likely to cause injury; however, swallowing larger amounts may cause injury. Low toxicity if swallowed.

LD50 (Rat): > 2,000 mg/kg
Assessment: The substance or mixture has no acute oral toxicity

**Acute inhalation toxicity**

Acute toxicity estimate: > 40 mg/l
Exposure time: 4 h
Test atmosphere: vapour
Method: Calculation method

**Acute dermal toxicity**

Remarks: Prolonged skin contact is unlikely to result in absorption of harmful amounts.

LD50 (Rat, male and female): > 2,000 mg/kg
Assessment: The substance or mixture has no acute dermal toxicity

**Components:**

Isopropyl hydroxylamine
Acute oral toxicity  
LD50 (Rat, male and female): 2,189 mg/kg

Acute inhalation toxicity  
Remarks: The LC50 has not been determined.

Acute dermal toxicity  
LD50 (Rat, male and female): > 2,000 mg/kg  
Symptoms: No deaths occurred at this concentration.  
Assessment: The substance or mixture has no acute dermal toxicity

Skin corrosion/irritation

**Product:**  
Remarks: Prolonged contact may cause slight skin irritation with local redness.

**Components:**  
Isopropyl hydroxylamine  

Result: No skin irritation  
Remarks: Brief contact may cause slight skin irritation with local redness.

**Serious eye damage/eye irritation**

**Product:**  
Remarks: May cause slight temporary eye irritation.  
Corneal injury is unlikely.

**Components:**  
Isopropyl hydroxylamine  

Result: No eye irritation  
Remarks: May cause moderate eye irritation.  
May cause slight corneal injury.

**Respiratory or skin sensitization**

**Product:**  
Remarks: For skin sensitization:  
Did not cause allergic skin reactions when tested in guinea pigs.

Remarks: For respiratory sensitization:  
No relevant information found.

**Components:**  
Isopropyl hydroxylamine  

Remarks: Did not demonstrate the potential for contact allergy in mice.

Remarks: For respiratory sensitization:  
No relevant data found.

**Carcinogenicity**

**Product:**
The minor component acetone oxime has caused an increase in benign liver tumors in rats when given in the drinking water for 18 months at a toxic dose level

**Components:**
- Isopropyl hydroxylamine

No relevant data found.

**IARC**
No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

**OSHA**
No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.

**NTP**
No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

**Teratogenicity**

**Product**
No relevant data found.

**Components:**
- Isopropyl hydroxylamine

No relevant data found.

**Mutagenicity**

**Product**
Animal genetic toxicity studies were negative.
In vitro genetic toxicity studies were predominantly negative.

**Components:**
- Isopropyl hydroxylamine
Animal genetic toxicity studies were negative.
In vitro genetic toxicity studies were predominantly negative.

**Reproductive toxicity**

**Product:**
No relevant data found.

**Components:**
- Isopropyl hydroxylamine
No relevant data found.
STOT - single exposure

**Product:**
Assessment: Evaluation of available data suggests that this material is not an STOT-SE toxicant.

**Components:**
Isopropyl hydroxylamine
Assessment: Evaluation of available data suggests that this material is not an STOT-SE toxicant.

Repeated dose toxicity

**Product:**
Remarks: No relevant data found.

**Components:**
Isopropyl hydroxylamine
Remarks: Based on available data, repeated exposures are not anticipated to cause significant adverse effects.

Aspiration toxicity

**Product:**
Aspiration Hazard
Based on physical properties, not likely to be an aspiration hazard.

**Components:**
Isopropyl hydroxylamine
Based on physical properties, not likely to be an aspiration hazard.

12. ECOLOGICAL INFORMATION

Ecotoxicity

**Components:**
Isopropyl hydroxylamine

Toxicity to fish
Remarks: Material is moderately toxic to aquatic organisms on an acute basis (LC50/EC50 between 1 and 10 mg/L in the most sensitive species tested).

- LC50 (Oncorhynchus mykiss (rainbow trout)): 465 mg/l
  Exposure time: 96.0 h
  Test Type: static test

- LC50 (Leuciscus idus (Golden orfe)): 510 mg/l
  Exposure time: 96.0 h

Toxicity to daphnia and other aquatic invertebrates
EC50 (Daphnia magna (Water flea)): 201.00 mg/l
Exposure time: 48.0 h
Test Type: semi-static test

EC50 (copepod Acartia tonsa): 1.40 mg/l
Exposure time: 48.0 h
Test Type: static test

Toxicity to algae

ErC50 (Skeletonema costatum): 32 mg/l
End point: Growth rate inhibition
Exposure time: 72 h
Test Type: static test

Toxicity to bacteria

EC50 (Bacteria): 130 mg/l
Exposure time: 16 h

Persistence and degradability

Components:
Isopropyl hydroxylamine

Biodegradability

Result: Not readily biodegradable.
Remarks: Based on stringent OECD test guidelines, this material cannot be considered as readily biodegradable; however, these results do not necessarily mean that the material is not biodegradable under environmental conditions.

Biodegradation: 40 %
Exposure time: 28 d
Method: OECD Test Guideline 301D or Equivalent
Remarks: 10-day Window: Fail

Biodegradation: 0 %
Exposure time: 28 d
Method: OECD Test Guideline 301F or Equivalent
Remarks: 10-day Window: Fail

ThOD

2.560 mg/mg

Photodegradation

Test Type: Half-life (indirect photolysis)
Sensitiser: OH radicals
Rate constant: Degradation half life: 0.13 d
Method: Estimated.

Bioaccumulative potential

Product:

Partition coefficient: n-octanol/water
Remarks: No test data available

Components:
Isopropyl hydroxylamine

Partition coefficient: n-octanol/water
log Pow: -0.574
Method: Measured
Remarks: Bioconcentration potential is low (BCF < 100 or Log Pow < 3).
Mobility in soil

**Components:**
Isopropyl hydroxylamine

Distribution among environmental compartments: 

- **Koc:** 11
- **Method:** Measured
- **Remarks:** Potential for mobility in soil is very high (Koc between 0 and 50).

Other adverse effects

**Product:**
Ozone-Depletion Potential

Regulation: 40 CFR Protection of Environment; Part 82 Protection of Stratospheric Ozone - CAA Section 602 Class I Substances

Remarks: This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).

**Components:**
Isopropyl hydroxylamine

Results of PBT and vPvB assessment:

- This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

Ozone-Depletion Potential: Remarks: no data available

13. DISPOSAL CONSIDERATIONS

**Disposal methods**

**Waste from residues:**

DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER.

All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations.

Regulations may vary in different locations.

Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator.

THE INFORMATION PRESENTED HERE PERTAINS ONLY TO THE PRODUCT AS SHIPPED IN ITS INTENDED CONDITION AS DESCRIBED IN MSDS SECTION:

Composition Information.

FOR UNUSED & UNCONTAMINATED PRODUCT, the preferred options include sending to a licensed, permitted: Incinerator or other thermal destruction device.

Landfill.

ANGUS HAS NO CONTROL OVER THE MANAGEMENT PRACTICES OR MANUFACTURING PROCESSES OF PARTIES HANDLING OR USING THIS MATERIAL.
14. TRANSPORT INFORMATION

International Regulation

IATA-DGR
Not regulated as a dangerous good

IMDG-Code
Not regulated as a dangerous good

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable for product as supplied.

National Regulations

49 CFR (DOT) – NON BULK
Not regulated as a dangerous good

49 CFR (DOT) - BULK

SARA 304 Extremely Hazardous Substances Reportable Quantity
This material does not contain any components with a section 304 EHS RQ.
SARA 311/312 Hazards  This product is not a hazardous chemical under 29CFR 1910.1200, and therefore is not covered by Title III of SARA.

SARA 302  No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313  This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Clean Air Act
This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).
This product does not contain any hazardous air pollutants (HAP), as defined by the U.S. Clean Air Act Section 12 (40 CFR 61).
This product does not contain any chemicals listed under the U.S. Clean Air Act Section 112(r) for Accidental Release Prevention (40 CFR 68.130, Subpart F).
This product does not contain any chemicals listed under the U.S. Clean Air Act Section 111 SOCMI Intermediate or Final VOC's (40 CFR 60.489).

Clean Water Act
This product does not contain any toxic pollutants listed under the U.S. Clean Water Act Section 307
