### 4. FIRST AID MEASURES

- **If inhaled**: Move person to fresh air; if effects occur, consult a physician.
- **In case of skin contact**: Wash off with plenty of water.
- **In case of eye contact**: Flush eyes thoroughly with water for several minutes. Remove contact lenses after the initial 1-2 minutes and continue flushing for several additional minutes. If effects occur, consult a physician, preferably an ophthalmologist.
- **If swallowed**: If swallowed, seek medical attention. Do not induce vomiting unless directed to do so by medical personnel.

#### Most important symptoms and effects, both acute and delayed
Aside from the information found under Description of first aid measures (above) and Indication of immediate medical attention and special treatment needed (below), any additional important symptoms and effects are described in Section 11: Toxicology Information.

#### Protection of first-aiders
If potential for exposure exists refer to Section 8 for specific personal protective equipment.

#### Notes to physician
Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. No specific antidote.

### 5. FIREFIGHTING MEASURES

- **Suitable extinguishing media**: This material does not burn. If exposed to fire from another source, use suitable extinguishing agent for that fire.
- **Specific hazards during firefighting**: None known.
- **Hazardous combustion**: Fire conditions may cause this product to decompose. Refer
products to section 10 - Thermal Decomposition.

Further information
Keep people away. Isolate fire and deny unnecessary entry. This material does not burn. Fight fire for other material that is burning.

Special protective equipment for firefighters
Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures
Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection.

Environmental precautions
Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.

Methods and materials for containment and cleaning up
Contain spilled material if possible. Collect in suitable and properly labeled containers. Use care to minimize generation of airborne dust. See Section 13, Disposal Considerations, for additional information.

7. HANDLING AND STORAGE

Advice on safe handling
Keep container closed. Good housekeeping and controlling of dusts are necessary for safe handling of product. Avoid generating and breathing dust. See Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION.

Engineering measures
Local exhaust ventilation may be necessary for some
operations. Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations.

**Personal protective equipment**

**Respiratory protection**  
Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, wear respiratory protection when adverse effects, such as respiratory irritation or discomfort have been experienced, or where indicated by your risk assessment process. In dusty or misty atmospheres, use an approved particulate respirator. The following should be effective types of air-purifying respirators: Particulate filter.

**Hand protection**  
Chemical protective gloves should not be needed when handling this material. Consistent with general hygienic practice for any material, skin contact should be minimized.
