ANGUS CHEMICAL COMPANY encourages and expects you to read and understand the entire (M)SDS, as there is important information throughout the document. We expect you to follow the precautions identified in this document unless your use conditions would necessitate other appropriate methods or actions.

1. PRODUCT AND COMPANY IDENTIFICATION

Manufacturer or supplier’s details
Company name of supplier: ANGUS CHEMICAL COMPANY
Address: 1500 E. LAKE COOK ROAD
Buffalo Grove IL 60089-6553
Customer Information Number: +1-847-808-3711
E-mail address: NAR_CC@ANGUS.COM
Emergency telephone number: 800-424-9300

Recommended use of the chemical and restrictions on use
Recommended use: Resin curing chemical use in wood adhesives
The ANGUS Chemical Company recommends that you use this product in a manner consistent with the listed use. If your intended use is not consistent with the stated use, please contact the Customer Information Group (see Section 1 of this data sheet).

2. HAZARDS IDENTIFICATION

GHS Classification
Flammable liquids: Category 4
Acute toxicity (Inhalation): Category 4
Skin irritation Category 2
Serious eye damage Category 1
Skin sensitisation Sub-category 1A

GHS Label elements, including precautionary statements

Hazard pictograms

Signal word Danger

Hazard statements
Combustible liquid.
Causes skin irritation.
May cause an allergic skin reaction.
Causes serious eye damage.
Harmful if inhaled.

Precautionary statements

Prevention:
Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.
Wash skin thoroughly after handling.
Use only outdoors or in a well-ventilated area.
Contaminated work clothing should not be allowed out of the workplace.
Wear protective gloves/ eye protection/ face protection.

Response:
IF ON SKIN: Wash with plenty of soap and water.
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor/ physician if you feel unwell.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/ physician.
If skin irritation or rash occurs: Get medical advice/ attention. Take off contaminated clothing and wash before reuse.
In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish.

Storage:
Store in a well-ventilated place. Keep cool.

Disposal:
Dispose of contents/ container to an approved waste disposal plant.

Other hazards
None known.

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

This product is a substance.

#### Components

</tbody>
</table>

### 4. FIRST AID MEASURES

**If inhaled**
Move person to fresh air. If person is not breathing, call an emergency responder or ambulance, then give artificial respiration; if by mouth to mouth use rescuer protection (pocket mask etc). Call a poison control center or doctor for treatment advice.

**In case of skin contact**
Take off contaminated clothing. Wash skin with soap and plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Wash clothing before reuse. Shoes and other leather items which cannot be decontaminated should be disposed of properly. Suitable emergency safety shower facility should be available in work area.

**In case of eye contact**
Wash immediately and continuously with flowing water for at least 30 minutes. Remove contact lenses after the first 5 minutes and continue washing. Obtain prompt medical consultation, preferably from an ophthalmologist. Suitable emergency eye wash facility should be immediately available.

**If swallowed**
Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Never give anything by mouth to an unconscious person.

**Most important symptoms and effects, both acute and delayed**
Aside from the information found under Description of first aid measures (above) and Indication of immediate medical attention and special treatment needed (below), any additional important symptoms and effects are described in Section 11: Toxicology Information.

**Protection of first-aiders**
First Aid responders should pay attention to self-protection and use the recommended protective clothing (chemical resistant gloves, splash protection). If potential for exposure exists refer to Section 8 for specific personal protective equipment.
Notes to physician

Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. No specific antidote. Chemical eye burns may require extended irrigation. Obtain prompt consultation, preferably from an ophthalmologist. Have the Safety Data Sheet, and if available, the product container or label with you when calling a poison control center or doctor, or going for treatment.

5. FIREFIGHTING MEASURES

Suitable extinguishing media

- Water fog or fine spray.
- Carbon dioxide fire extinguishers.
- Dry chemical fire extinguishers.
- Foam.
- Alcohol resistant foams (ATC type) are preferred. General purpose synthetic foams (including AFFF) or protein foams may function, but will be less effective.

Specific hazards during firefighting

- Container may rupture from gas generation in a fire situation.

Hazardous combustion products

- During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and/or irritating.
- Combustion products may include and are not limited to: Carbon dioxide. Carbon monoxide. Nitrogen oxides.

Further information

- Keep people away. Isolate fire and deny unnecessary entry.
- Fight fire from protected location or safe distance. Consider the use of unmanned hose holders or monitor nozzles.
- Burning liquids may be moved by flushing with water to protect personnel and minimize property damage.
- Burning liquids may be extinguished by dilution with water. Immediately withdraw all personnel from the area in case of rising sound from venting safety device or discoloration of the container.
- Move container from fire area if this is possible without hazard.
- Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of reignition has passed.

Special protective equipment for firefighters

- Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots, and gloves). Avoid contact with this material during fire fighting operations. If contact is likely, change to full chemical resistant fire fighting clothing with self-contained breathing apparatus. If this is not available, wear full chemical resistant clothing with self-contained breathing apparatus and fight fire from a remote location.
For protective equipment in post-fire or non-fire clean-up situations, refer to the relevant sections.

6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protective equipment and emergency procedures | Keep upwind of spill.  
| Ventilate area of leak or spill.  
| No smoking in area.  
| Only trained and properly protected personnel must be involved in clean-up operations.  
| Evacuate area.  
| Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection.  
| Refer to section 7, Handling, for additional precautionary measures. |

| Environmental precautions | Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information. |

| Methods and materials for containment and cleaning up | Contain spilled material if possible.  
| Collect in suitable and properly labeled containers.  
| See Section 13, Disposal Considerations, for additional information. |

7. HANDLING AND STORAGE

| Advice on safe handling | Avoid breathing vapor.  
| Keep away from heat, sparks and flame.  
| Containers, even those that have been emptied, can contain vapors. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers.  
| Wash thoroughly after handling.  
| Use with adequate ventilation.  
| Keep container closed.  
| Do not get in eyes.  
| Avoid contact with skin and clothing.  
| Avoid prolonged or repeated contact with skin.  
| See Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION. |

| Conditions for safe storage | Recommend storage in a cool, dry place away from high temperatures, hot pipes and direct sunlight.  
| Do not store in:  
| Aluminum.  
| Aluminum alloys.  
| Copper.  
| Copper alloys. |
8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Components with workplace control parameters
Contains no substances with occupational exposure limit values.

Engineering measures
Local exhaust ventilation may be necessary for some operations. Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations.

Personal protective equipment
Respiratory protection
Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, wear respiratory protection when adverse effects, such as respiratory irritation or discomfort have been experienced, or where indicated by your risk assessment process. For most conditions, no respiratory protection should be needed; however, if material is heated or sprayed, use an approved air-purifying respirator. The following should be effective types of air-purifying respirators: Organic vapor cartridge with a particulate pre-filter, type AP2.

Hand protection
Use gloves chemically resistant to this material. Examples of preferred glove barrier materials include: Polyethylene. Ethyl vinyl alcohol laminate ("EVAL"). Examples of acceptable glove barrier materials include: Viton. Butyl rubber. Neoprene. Polyvinyl chloride ("PVC" or "vinyl"). Nitrile/butadiene rubber ("nitrile" or "NBR"). Avoid gloves made of: Polyvinyl alcohol ("PVA"). NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

Eye protection
Use chemical goggles.

Skin and body protection
Use protective clothing chemically resistant to this material. Selection of specific items such as face shield, boots, apron, or full body suit will depend on the task.

Viscosity

Viscosity, dynamic 5.2 mPa.s (20 °C)
Method: OECD 114

Explosive properties No data available.

Oxidizing properties No data available.

Surface tension 71.4 mN/m, 25 °C

Molecular weight 143.19 g/mol
Method: Literature

NOTE: The physical data presented above are typical values and should not be construed as a specification.

10. STABILITY AND REACTIVITY

Reactivity No dangerous reaction known under conditions of normal use.

Chemical stability Stable under recommended storage conditions. See Storage, Section 7.

Conditions to avoid Exposure to elevated temperatures can cause product to decompose. Generation of gas during decomposition can cause pressure in closed systems.

Incompatible materials Reaction with acid can generate flammable formaldehyde gas. Avoid contact with oxidizing materials. Avoid contact with:
Strong acids.
Halogenated hydrocarbons.
Avoid unintended contact with:
Acidic pH.

Hazardous decomposition products Decomposition products depend upon temperature, air supply and the presence of other materials. Toxic flammable gases can be released during decomposition. Decomposition products can include and are not limited to:
Formaldehyde.

11. TOXICOLOGICAL INFORMATION

Toxicological information on this product or its components appear in this section when such data is available.

Acute toxicity

Product:
Acute oral toxicity
Remarks: Small amounts swallowed incidentally as a result of normal handling operations are not likely to cause injury; however, swallowing larger amounts may cause injury. Low toxicity if swallowed.

LD50 (Rat): > 3,600 mg/kg

Acute inhalation toxicity
Remarks: At room temperature, exposure to vapor is minimal due to low volatility. Vapor from heated material or mist may cause respiratory irritation. Based on the available data, narcotic effects were not observed.

LC50 (Rat): 3.1 mg/l
Exposure time: 4 h
Test atmosphere: dust/mist

Acute dermal toxicity
Remarks: Prolonged skin contact is unlikely to result in absorption of harmful amounts.

LD50
(Rat, male and female): > 2,000 mg/kg

Components:
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole

Acute oral toxicity
LD50 (Rat, male): > 3,674 mg/kg

Other (Rat, female): 5,249 mg/kg

Acute inhalation toxicity
Remarks: At room temperature, exposure to vapor is minimal due to low volatility. Vapor from heated material or mist may cause respiratory irritation. Based on the available data, narcotic effects were not observed.

LC50 (Rat): 3.1 mg/l
Exposure time: 4 h
Test atmosphere: dust/mist

Acute dermal toxicity
LD50 (Rat, male and female): > 2,000 mg/kg

4-Ethyl-4-(hydroxymethyl)oxazolidine

Acute oral toxicity
Remarks: Single dose oral LD50 has not been determined.

Acute inhalation toxicity
Remarks: The LC50 has not been determined.

Acute dermal toxicity
Remarks: The dermal LD50 has not been determined.

Acute oral toxicity
LD50 (Rat, male): > 3,674 mg/kg

Other (Rat, female): 5,249 mg/kg
Acute inhalation toxicity  Remarks: At room temperature, exposure to vapor is minimal due to low volatility. Vapor from heated material or mist may cause respiratory irritation. Based on the available data, narcotic effects were not observed.

LC50 (Rat): 3.1 mg/l
Exposure time: 4 h
Test atmosphere: dust/mist

Acute dermal toxicity  LD50 (Rat, male and female): > 2,000 mg/kg

Skin corrosion/irritation

**Product:**
Result: Skin irritation
Remarks: Repeated contact may cause severe skin irritation with local redness and discomfort. Prolonged contact may cause severe skin irritation with local redness and discomfort.

Remarks: Not classified as corrosive to the skin according to DOT guidelines.

**Components:**
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole

Result: Skin irritation
Remarks: Brief contact may cause slight skin irritation with local redness. Repeated contact may cause severe skin irritation with local redness and discomfort. Prolonged contact may cause severe skin irritation with local redness and discomfort.

Remarks: Not classified as corrosive to the skin according to DOT guidelines.

Result: Skin irritation
Remarks: Brief contact may cause slight skin irritation with local redness. Repeated contact may cause severe skin irritation with local redness and discomfort. Prolonged contact may cause severe skin irritation with local redness and discomfort.

Remarks: Not classified as corrosive to the skin according to DOT guidelines.

Serious eye damage/eye irritation

**Product:**
Result: Corrosive
Remarks: May cause severe irritation with corneal injury which may result in permanent impairment of vision, even blindness. Chemical burns may occur. Mist may cause eye irritation.

**Components:**
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole

Result: Corrosive
Remarks: May cause severe irritation with corneal injury which may result in permanent
impairment of vision, even blindness. Chemical burns may occur. Mist may cause eye irritation.

Result: Corrosive
Remarks: May cause severe irritation with corneal injury which may result in permanent impairment of vision, even blindness. Chemical burns may occur. Mist may cause eye irritation.

Respiratory or skin sensitization

Product:
Assessment: Skin sensitiser
Remarks: For skin sensitization:
Has caused allergic skin reactions when tested in guinea pigs.
Results from human studies indicate that this material has the potential to cause an allergic skin reaction at high concentrations.

Remarks: For respiratory sensitization:
No relevant data found.

Components:
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole

Assessment: May cause sensitisation by skin contact.
Remarks: Has caused allergic skin reactions when tested in guinea pigs.
Results from human studies indicate that this material has the potential to cause an allergic skin reaction at high concentrations.

Remarks: For respiratory sensitization:
No relevant data found.

Carcinogenicity

Product:
No relevant data found.

Components:
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole

No relevant data found.
No relevant data found.

IARC
No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

OSHA
No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.

NTP
No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

Teratogenicity

Product
Did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

Components:
7a-Ethylidihydro-1H,3H,5H-oxazolo(3,4-c)oxazole
Did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

Mutagenicity

Product
Animal genetic toxicity studies were negative.
In vitro genetic toxicity studies were predominantly negative.

Components:
7a-Ethylidihydro-1H,3H,5H-oxazolo(3,4-c)oxazole
Animal genetic toxicity studies were negative.
In vitro genetic toxicity studies were predominantly negative.

Reproductive toxicity

Product:
In animal studies, did not interfere with reproduction.

Components:
7a-Ethylidihydro-1H,3H,5H-oxazolo(3,4-c)oxazole
In animal studies, did not interfere with reproduction.
In animal studies, did not interfere with reproduction.

**STOT - single exposure**

**Product:**
Assessment: Available data are inadequate to determine single exposure specific target organ toxicity.

**Components:**
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole
Assessment: Evaluation of available data suggests that this material is not an STOT-SE toxicant.

Assessment: Evaluation of available data suggests that this material is not an STOT-SE toxicant.

**Repeated dose toxicity**

**Product:**
Remarks: In animals, effects have been reported on the following organs after ingestion: Stomach.

**Components:**
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole
Remarks: In animals, effects have been reported on the following organs: Stomach.

Remarks: In animals, effects have been reported on the following organs: Stomach.

**Aspiration toxicity**

**Product:**
Aspiration Hazard Based on physical properties, not likely to be an aspiration hazard.

**Components:**
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole
Based on physical properties, not likely to be an aspiration hazard.

Based on physical properties, not likely to be an aspiration hazard.
12. ECOLOGICAL INFORMATION

Ecotoxicity

**Product:**
Toxicity to fish

Remarks: Material is moderately toxic to fish on an acute basis (LC50 between 1 and 10 mg/L).

- LC50 (Oncorhynchus mykiss (rainbow trout)): 244 mg/l
  - Exposure time: 96.0 h
  - Test Type: flow-through test
  - Method: OECD Test Guideline 203 or Equivalent

- LC50 (Lepomis macrochirus (Bluegill sunfish)): 130 mg/l
  - Exposure time: 96.0 h
  - Test Type: static test

Toxicity to daphnia and other aquatic invertebrates

- EC50 (Daphnia magna (Water flea)): 16.90 mg/l
  - Exposure time: 48.0 h
  - Test Type: flow-through test
  - Method: OECD Test Guideline 202 or Equivalent
  - GLP: yes

- EC50 (eastern oyster (Crassostrea virginica)): 35.00 mg/l
  - Exposure time: 96.0 h
  - Test Type: flow-through test

- LC50 (pink shrimp (Penaeus duorarum)): 138.00 mg/l
  - Exposure time: 96.0 h
  - Test Type: static test

Toxicity to algae

- ErC50 (Pseudokirchneriella subcapitata (green algae)): 1.08 mg/l
  - End point: Growth rate inhibition
  - Exposure time: 72 h
  - Test Type: static test
  - Method: OECD Test Guideline 201 or Equivalent

- ErC50 (Skeletonema costatum): 2.09 mg/l
  - End point: Growth rate inhibition
  - Exposure time: 96 h
  - Test Type: static test
  - Method: OECD Test Guideline 201 or Equivalent

- NOEC (Scenedesmus capricornutum (fresh water algae)): 0.513 mg/l
  - End point: Growth rate
  - Exposure time: 72 h
  - Test Type: semi-static test
  - Method: OECD Test Guideline 201 or Equivalent

Toxicity to bacteria

- EC50 (activated sludge): 166 mg/l
  - End point: Respiration rates.
Components:
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole

Toxicity to fish
Remarks: Material is moderately toxic to aquatic organisms on an acute basis (LC50/EC50 between 1 and 10 mg/L in the most sensitive species tested).

ThOD  
2.350 mg/mg  

Stability in water  
Test Type: Hydrolysis  
Degradation half life (DT50): 0.089 - 9.6 h (15 °C) pH: 4 - 9  
Method: OECD Test Guideline 111  
Remarks: Hydrolyses readily.  

Test Type: Hydrolysis  
Degradation half life (DT50): 0.1 - 3.799 h (25 °C) pH: 4 - 9  
Method: OECD Test Guideline 111  
Remarks: Hydrolyses readily.  

Photodegradation  
Rate constant: Degradation half life: 0.0625 h  
Method: Estimated.  

Bioaccumulative potential  

Product:  
Bioaccumulation  
Species: Fish.  
Bioconcentration factor (BCF): 2 - 3  
Method: Measured  

Partition coefficient: n-octanol/water  
log Pow: -0.32  
Method: EC Method A6  
Remarks: Bioconcentration potential is low (BCF < 100 or Log Pow < 3).  

Components:  
7a-Ethyldihydro-1H,3H,5H-oxazolo(3,4-c)oxazole  
Bioaccumulation  
Species: Fish.  
Bioconcentration factor (BCF): 2 - 3  
Method: Measured  

Partition coefficient: n-octanol/water  
log Pow: -0.32 (25 °C)  
Method: EC Method A6  
Remarks: Bioconcentration potential is low (BCF < 100 or Log Pow < 3).

**4-Ethyl-4-(hydroxymethyl)oxazolidine**

**Results of PBT and vPvB assessment**
This substance has not been assessed for persistence, bioaccumulation and toxicity (PBT).

**Results of PBT and vPvB assessment**
This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

**Ozone-Depletion Potential**
Remarks: No relevant data found.

### 13. DISPOSAL CONSIDERATIONS

**Disposal methods**

- **Waste from residues**
  - DO NOT DUMP INTO ANY SEwers, ON THE GROUND, OR INTO ANY BODY OF WATER.
  - All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations.
  - Regulations may vary in different locations.
  - Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator.
  - AS YOUR SUPPLIER, WE HAVE NO CONTROL OVER THE MANAGEMENT PRACTICES OR MANUFACTURING PROCESSES OF PARTIES HANDLING OR USING THIS MATERIAL.
  - THE INFORMATION PRESENTED HERE PERTAINS ONLY TO THE PRODUCT AS SHIPPED IN ITS INTENDED CONDITION AS DESCRIBED IN MSDS SECTION: Composition Information.
  - FOR UNUSED & UNCONTAMINATED PRODUCT, the preferred options include sending to a licensed, permitted:  
    - Incinerator or other thermal destruction device.
    - Landfill.

### 14. TRANSPORT INFORMATION

**International Regulation**

- **IATA-DGR**
  - Not regulated as a dangerous good

- **IMDG-Code**
  - Not regulated as a dangerous good

- **Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code**
  - Not applicable for product as supplied.

**National Regulations**

- **49 CFR (DOT) – NON BULK**
Not regulated as a dangerous good

49 CFR (DOT) - BULK

This information is not intended to convey all specific regulatory or operational requirements/information relating to this product. Transportation classifications may vary by container volume and may be influenced by regional or country variations in regulations. Additional transportation system information can be obtained through an authorized sales or customer service representative. It is the responsibility of the transporting organization to follow all applicable laws, regulations and rules relating to the transportation of the material.

15. REGULATORY INFORMATION

OSHA Hazards
This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

EPCRA - Emergency Planning and Community Right-to-Know Act

SARA 311/312 Hazards
Fire Hazard
Acute Health Hazard

SARA 302
No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313
This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Clean Air Act
This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).
This product does not contain any hazardous air pollutants (HAP), as defined by the U.S. Clean Air Act Section 12 (40 CFR 61).
This product does not contain any chemicals listed under the U.S. Clean Air Act Section 112(r) for Accidental Release Prevention (40 CFR 68.130, Subpart F).
This product does not contain any chemicals listed under the U.S. Clean Air Act Section 111 SOCMI Intermediate or Final VOC’s (40 CFR 60.489).

US State Regulations

Massachusetts Right To Know
No components are subject to the Massachusetts Right to Know Act.
New Jersey Right To Know
The following chemicals are listed because of the additional requirements of New Jersey law:

<table>
<thead>
<tr>
<th>Cas No.</th>
<th>Component</th>
</tr>
</thead>
<tbody>
<tr>
<td>53019-53-7</td>
<td>4-Ethyl-1,3-oxazolidine</td>
</tr>
</tbody>
</table>

California Prop. 65
This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.

The components of this product are reported in the following inventories:
United States TSCA Inventory
All Components OK
